

POST EXTRACTOR

INTRODUCTION

Post extractor is a specialized attachment for pile drivers designed to **efficiently remove installed posts or piles** from the ground. It is particularly useful for **repositioning, replacing, or decommissioning piles** in various construction, fencing, and infrastructure projects, agricultural, and solar farm applications. The system applies **30,000 Kp of force** to extract posts with minimal effort, preventing damage to both the post and the surrounding ground.
